Creating the tastiness of animal-fat through plant-based ingredients

Miyoshi Oil & Fat Co., Ltd. has thoroughly analyzed the ingredients that create the aroma of animal-fat taste such as that contained in conventional butter and lard. Using our own unique technology to create aroma and taste, we have succeeded in creating a brand new tastiness of the special properties of animal-fat taste from only plant-based ingredients.

With plant-based foods becoming more and more popular around the world, we develop revolutionary products from the botanova brand and bring them to the market.

Plant-based Seasoning Oil —Tallow Taste—

This cooking oil has the flavor of tallow without using ingredients from animals. Using Miyoshi's unique technology to create a unique taste, we have created an authentic animal-fat taste from only plant-based ingredients.

The Special Properties Behind Our Flavor

- Has the flavor of broiled meat (broiled feeling) and that sweet-tasting fat that is peculiar to Japanese beef.
- Uniquely seasoning oils to enhance the feeling of satisfaction and maintain the flavor of oil for a long time.
- Sweetness, flavor and strong aroma of oils as if this product was made of animal-fat.

Recommended Uses

- Use as oil to mix into a plant-based meat patty.
- Use as oil for sautéing roast meat.
- Use as a flavor-and aroma-enhancer for curry and sauces.

The Special Characteristics Behind Our Product

- Plant-based ingredients create a flavor that closely resembles beef
- Covers up the raw smell of plant protein
- Vegan certification by VegeProject Japan
- Doesn't include green onions, scallions, garlic, onions or leeks, which are collectively called the "five pungent roots"
- Doesn't include alcohol (as an ingredient)*
- Uses RSPO certified oils

2-0787-17-100-00

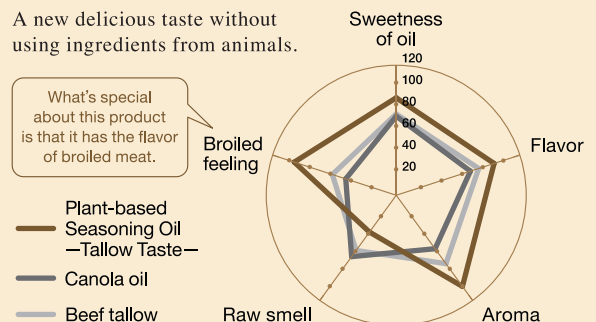

We use the same facilities to also manufacture products that contain ingredients from animals.

* Alcohol is used in the sanitation control of the manufacturing facilities.

Sensory Evaluation of Hamburger Patties with Soy-meat

A new delicious taste without using ingredients from animals.

Add at a ratio equal to 20% of the amount of soy burger used [n=16]

Package: 5kg in a cardboard box
Storage method: Store in a cool dark place to avoid direct sunlight and moisture.
